Security Clearance: Active Secret (Eligible for Top Secret/SCI)

Professional Summary

Mission-driven Cybersecurity Professional with experience securing classified and enterprise networks in the U.S. Marine Corps. Skilled in vulnerability management, Active Directory administration, network hardening, and DoD/NIST compliance. Proven ability to identify security gaps, mitigate risks, and deliver actionable improvements. Experienced in communicating technical concepts to audiences of varying backgrounds. Bilingual (English/Spanish).

Core Competencies

Vulnerability Assessment & Remediation • System & Network Hardening • Security Compliance (DISA STIGs, RMF, NIST 800-53/171, CMMC, ISO 27001) Identity & Access Management • Incident Response & Threat Mitigation • Encryption & Data Protection • Risk Management & Reporting • Team Leadership & Technical Training

Professional Experience

Data Systems Administrator (MOS 0671) United States Marine Corps February 2019-February 2023

- Secured classified and unclassified networks per DoD cybersecurity standards.
- Administered Active Directory, auditing access and enforcing password policies.
- Provided end user support to clients on the enterprise network while ensuring clients are up to date on proper security practices.
- Hardened servers and reimaged 100+ systems to meet DoD/NIST standards.
- Conducted vulnerability scans with multiple SIEM tools on local area networks (ACAS/Nessus/, Splunk) and implemented mitigations, reducing vulnerabilities by 25% quarterly.
- Designed, built, and managed an end-to-end network infrastructure, including physical cabling, switch configuration, server deployment, application testing, and post-deployment administration (Active Directory, Group Policy, user and system management) while ensuring every layer complied with DoD security standards.
- Completed enterprise security audits to deliver security reports and briefings for senior leadership.
- Provided hands-on leadership during high-pressure missions, maintaining team cohesion, driving accountability, and ensuring successful completion of objectives in dynamic environments.
- Supervised and trained junior Marines in network operations, cybersecurity compliance, troubleshooting, and military readiness, improving team capability and operational efficiency
- Applied DISA STIGs to harden Windows/Linux systems and network devices, ensuring compliance and reducing exploitable vulnerabilities across DoD environments.

Guest Service Representative LBA hospitality February 2025-Current

- Provided first-line technical support for guests, resolving issues with Wi-Fi connectivity, keycard access systems, business center equipment, and POS/PMS software, mirroring service desk troubleshooting workflows.
- Handled sensitive guest information and payment data in accordance with PCI security standards, reinforcing secure data handling and access control practices.
- Maintained operational continuity in a fast-paced environment, demonstrating strong communication, problem-solving, and customer support skills transferable to IT and cybersecurity roles.
- Documented incidents, coordinated escalations, and communicated with management and IT teams, aligning with IT ticketing and incident response processes.

Technical Skills & Certifications

ACAS (Nessus), Splunk, DISA STIGs, SCAP Windows Defender, DoD CMMC
Windows Server 2016/2019, Linux (RHEL/Ubuntu), Active Directory, DHCP, DNS, Exchange
Cisco Routers/Switches, VLANs, TCP/IP, VPNs, Firewalls, Vulnerability Scanning, Threat Analysis, Incident Response, Security Monitoring

SIEM tools (Splunk, ArcSight, Elastic)
Ticketing systems (Remedy, ServiceNow)
VMware (ESXi, vCenter)
Command-line tools (PowerShell, Bash)
Network monitoring utilities (Wireshark, ping, tracert, netstat)
Remedy, ServiceNow (ticketing systems)
CompTIA Security+ (In progress)

Education

BA bachelor's in management information systems (MIS) Sam Houston State University (In progress) August 2023-May 2027
