

FRANCISCO NATIVI

Cybersecurity | Network Security | Systems Administration

Houston, TX | 713-498-2125 | frank.j.nativi@gmail.com | [linkedin.com/in/francisco-nativi-14b3a6252](https://www.linkedin.com/in/francisco-nativi-14b3a6252) | nativifrank.github.io/index.html

Active Secret Clearance (Eligible TS/SCI) | TWIC Cardholder | CompTIA Security+

PROFESSIONAL SUMMARY

Cybersecurity and network security professional with U.S. Marine Corps experience securing classified and enterprise environments, administering network infrastructure, hardening Windows/Linux systems, and driving vulnerability remediation. Hands-on experience with Cisco networking, Active Directory, Splunk, ACAS/Nessus, Microsoft Defender, VMware, Cloudflare, Git, Docker, PowerShell/Bash, and security controls aligned to DISA STIGs, RMF, NIST 800-53/800-171, and CMMC. Experienced in incident troubleshooting, security audits, CVE remediation, risk mitigation, and communicating technical findings to users and leadership.

CORE TECHNICAL SKILLS

Network Security: LAN/WAN, TCP/IP, Cisco switches/routers, VLANs, VPNs, firewalls, DNS, DHCP, Wireshark, network hardening **Security Operations:** Splunk, ACAS/Nessus, Microsoft Defender, vulnerability scanning, CVE remediation, incident response, SIEM monitoring **Systems/Identity:** Windows Server 2016/2019, RHEL/Ubuntu, Active Directory, Group Policy, MFA concepts, access control **Infrastructure/DevOps:** VMware ESXi/vCenter, Cloudflare/Cloudflare Tunnel, Git/GitHub, Docker, PowerShell, Bash, Python fundamentals, Prometheus/Grafana

PROFESSIONAL EXPERIENCE

United States Marine Corps - Data Systems Administrator (MOS 0671) | Feb 2019 - Feb 2023

- Secured classified and unclassified networks to DoD cybersecurity standards; administered Windows Server, Active Directory, Group Policy, DNS/DHCP, Cisco switching/routing, user access, and enterprise endpoints.
- Conducted vulnerability assessments with ACAS/Nessus and Splunk, prioritized remediation, and implemented mitigations that reduced identified vulnerabilities by approximately 25% quarterly.
- Hardened and reimaged 100+ Windows/Linux systems using DISA STIGs and NIST-aligned controls; supported CVE remediation, security audits, risk mitigation, and technical briefings for senior leadership.
- Designed, built, and administered end-to-end network infrastructure including cabling, switches, servers, application testing, Active Directory, Group Policy, and post-deployment security administration.
- Investigated system/network incidents, performed troubleshooting and root-cause analysis, documented corrective actions, and trained junior Marines in network operations and cybersecurity compliance.
- Performed enterprise cybersecurity audits, validated security controls, and delivered technical findings and remediation recommendations to senior leadership.

Global Shop Solutions - Customer Care Technical Team Intern | 2026

- Supported enterprise ERP environments by troubleshooting Windows, database, DNS, network-port, ODBC, service, and client/server connectivity issues; used logs, traces, test environments, and structured incident documentation to isolate root causes and escalate complex issues.
- Reproduced customer issues in controlled test environments, reviewed application behavior and service dependencies, and communicated findings with customers and internal technical teams.

LBA Hospitality - Guest Service Representative | Feb 2025 - Present

- Provide front-line technical support for Wi-Fi, access systems, POS/PMS applications, and business-center equipment while protecting sensitive customer/payment data and coordinating incident escalation.

SELECTED SECURITY & INFRASTRUCTURE PROJECTS

- Built secure Raspberry Pi services using Cloudflare DNS/Tunnel, Flask APIs, Linux systemd, SSH, CORS restrictions, and least-exposure design principles; troubleshoot DNS, ports, services, and connectivity.
- Deployed Docker-based Prometheus, Grafana, and Node Exporter monitoring; used Git/GitHub for source control and worked hands-on with Linux, Bash, Python, APIs, networking, and infrastructure observability.
- Integrated a GitHub Pages front end with a Raspberry Pi Flask REST API through Cloudflare Tunnel and CORS restrictions, reinforcing secure application-to-infrastructure communication.

EDUCATION

B.B.A. Management Information Systems, Sam Houston State University - Expected Dec 2026

CERTIFICATIONS & CREDENTIALS

CompTIA Security+ | Transportation Worker Identification Credential (TWIC) | Active Secret Clearance (Eligible TS/SCI) | Bilingual: English/Spanish
